Primary Examiner, Art Unit 3643

The following is an examiner's statement of reasons for allowance: The method of facilitating detachment of meat from the shell of a lobster is believed to be in condition for allowance and the application is being forwarded to issue. The prior art of record does not anticipate nor render obvious with the proper teaching(s) the claimed invention. The claimed invention is directed the detachment of meat from a lobster including a series of steps including exposing the lobster to high pressure at a certain temperature range over a period of time. The Applicant has provided an Information Disclosure Statement which includes references to **He et al**-Use of High pressure Processing for Oyster Shucking and Shelf-life Extension and **Flick, Jr**-High Hydrostatic Pressure Processing Has Potential. The Examiner does not believe these references to be pertinent to the claimed invention because neither reference discusses the detachment of lobster meat, nor are the specific pressures, temperatures and time periods taught. As such, the application is believed to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
